The Second International Conference on Risk Management

Kazakhstan has these days one of the world's fastest growing economies. Over the past five years, Kazakhstan saw broadly based growth across all industry segments, with GDP increasing by 9% to 10% a year. In this highly challenging environment, senior managers – in industry and the financial segment alike – are exposed to an array of new issues.

Critical for future success, according to a majority of analysts, is the ability to handle risk and respond quickly to emerging opportunities. Keen on acquiring expertise in risk management and related areas, Kazakhstan domiciled companies are committed to building strong partnerships with leading members of the global insurance, reinsurance and broker communities, as well as major research centers, on a worldwide basis.

For the second year in a row, International Conference on Risk Management, organized by Eurasia Insurance Co, aims to facilitate information and experience sharing between Kazakhstan and the global market, and also strengthen ties between the two communities. The organizers believe that the best way to achieve it is through personal contacts and relationships.

You will learn:

- **What are current and emerging trends in risk management: Russia, Kazakhstan and worldwide**
- **Risk management policies for large industrial corporations**
- **How to monitor and assess exposure in industry and infrastructure**
- **Insurance and reinsurance technologies for handling natural and man-made risks**
- **Insights and success stories from risk management professionals**
- **What incentives risk management business offers for investors**
